EX.NO. 9 Roll no: 210701289

# HADOOP DEMONSTRATE THE MAP REDUCE PROGRAMMING MODEL BYCOUNTING THE NUMBER OF WORDS IN A FILE

#### AIM:

To demonstrate the MAP REDUCE programming model for counting the number of words in a file.

#### **PROCEDURE:**

Step 1 - Open Terminal

\$ su hduser

Password:

Step 2 - Start dfs and mapreduce services

\$ cd /usr/local/hadoop/hadoop-2.7.2/sbin

\$ start-dfs.sh

\$ start-yarn.sh

\$ jps

## Step 3 - Check Hadoop through web UI

// Go to browser type http://localhost:8088 – All Applications Hadoop Cluster

// Go to browser type http://localhost:50070 — Hadoop Namenode

## **Step 4** – Open New Terminal

\$ cd Desktop/\$

mkdir inputdata

\$ cd inputdata/

\$ echo "Java Dart Java Hello World" >>input.txt

\$ cat>> input.txt

## Step 5 – Go back to old Terminal

\$ hadoop fs —copyFromLocal /home/hduser/Desktop/inputdata/input.txt /folder/hduser // Check in input.txt in Namenode using Web UI

## **Step 6** – WordCount Program

- Mapper.py
- Reducer.py

## Mapper.py

```
#!C:/ProgramData/chocolatey/bin/python3.ex
e import sys for line in sys.stdin: line =
line.strip() words = line.split() for word in
words:
    print('0%s\t0%s' 0% (word, 1))
```

# Reducer.py

#### **OUTPUT:**

```
C:\>hadoop
Usage: hadoop [--config confdir] [--loglevel loglevel] COMMAND
where COMMAND is one of:
                      run a generic filesystem user client
 version
                      print the version
                     run a jar file
 jar <jar>
                      note: please use "yarn jar" to launch
                            YARN applications, not this command.
 checknative [-a|-h] check native hadoop and compression libraries availability
                      validate configuration XML files
 conftest
 distch path:owner:group:permisson
                      distributed metadata changer
 distcp <srcurl> <desturl> copy file or directories recursively
 archive -archiveName NAME -p  parent path> <src>* <dest> create a hadoop archive
                      prints the class path needed to get the
 classpath
                      Hadoop jar and the required libraries
 credential
                      interact with credential providers
 inipath
                      prints the java.library.path
 kerbname
                      show auth_to_local principal conversion
                      diagnose kerberos problems
 kdiag
                      manage keys via the KeyProvider
 key
 trace
                      view and modify Hadoop tracing settings
 daemonlog
                      get/set the log level for each daemon
 CLASSNAME
                      run the class named CLASSNAME
Most commands print help when invoked w/o parameters.
```

```
C:\>hadoop version

Hadoop 3.3.6

Source code repository https://github.com/apache/hadoop.git -r 1be78238728da9266a4f88195058f08fd012bf9c

Compiled by ubuntu on 2023-06-18T08:22Z

Compiled on platform linux-x86_64

Compiled with protoc 3.7.1

From source with checksum 5652179ad55f76cb287d9c633bb53bbd

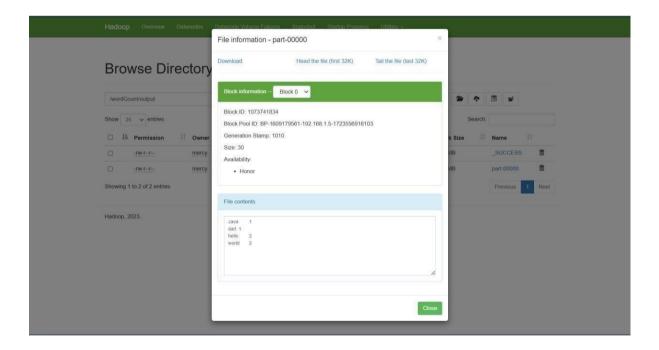

This command was run using /C:/hadoop-3.3.6/share/hadoop/common/hadoop-common-3.3.6.jar
```

#### C:\>start-all.cmd

This script is Deprecated. Instead use start-dfs.cmd and start-yarn.cmd starting yarn daemons

```
C:\>jps
19572 ResourceManager
19972 NodeManager
7028 NameNode
360 Jps
15628 Eclipse
19468 DataNode
```

```
C:\>hadoop fs -cat /wordCount/output/part-00000
Java 1
dart 1
hello 2
world 2
C:\>
```

## **RESULT:**

Thus the implementation of the python mapper and reducer programs using MapReduce to count the words in a text file using Hadoop is executed successfully.
